---

---

---

3. What are some consistent differences used to distinguish one type of animal from another?

---

---

### Adapting to the Marine Environment

1. An example of a warm blooded animal is: \_\_\_\_\_

2. An example of a cold blooded animal is: \_\_\_\_\_

3. What are the two groups of mammals that have adapted to living in water and what are some examples of each?

---

---

---

## Mammals at Marineland

Navigate to the Marine Mammal Information as well as the Wildlife displays at the top of the page. The types of mammals are displayed on the left hand side of the page. Click on the name of the mammal to explore each.

### Assignment:

Congratulations! You have been hired by Marineland of Canada to research and create an informative brochure. Choose one marine mammal, and one land mammal from Marineland's website. For your brochure you should have information on the mammals' appearances, habitats, diets and their reproduction and offspring. Include any interesting outside information you have learned about the mammals. In the brochure you will make note of the similarities and the differences between the marine mammal and the land mammal you have chosen. Include pictures to aid the readers in their understanding of the mammals.
